

WHITEPAPER VERSION

MOON PAPER

INTRODUCTION

Moon doge is a decentralized platform built on the blockchain that aims to provide a secure and seamless experience for users to trade and manage their assets. The platform comprises of a decentralized exchange (DEX) and a wallet to meet the ever-growing demand for a reliable and user-friendly platform in the cryptocurrency market.

PROBLEM STATEMENT

The current cryptocurrency market is filled with centralized exchanges that pose a risk to user's assets due to the potential for hacks, security breaches, and mismanagement. This has led to a lack of trust among users and the need for a decentralized solution that puts the user's assets in their hands.

SOLUTION

Moon doge offers a decentralized exchange and wallet, where users have full control over their assets and can trade and manage them in a secure and decentralized manner. With moon doge, users can trade a wide range of digital assets, including cryptocurrencies, NFTs, and meme tokens, in a fast and efficient manner.

DECENTRALIZED EXCHANGE (DEX)

Moon swap is built on a decentralized and trustless platform, meaning that users can trade their assets without the need for intermediaries. The platform operates on a smart contract-based system, ensuring that all trades are executed automatically and transparently.

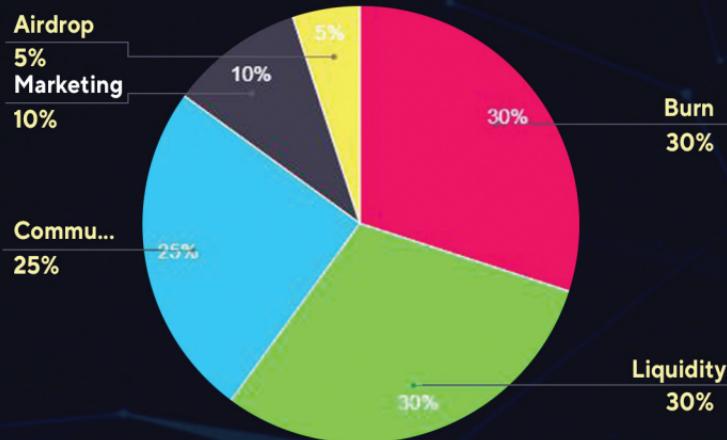

MOON WALLET

Moon wallet is designed to provide users with a secure and convenient platform to store and manage their digital assets. The wallet integrates with the DEX, enabling users to trade their assets without leaving the wallet. Additionally, the wallet supports a wide range of digital assets, making it a one-stop-shop for all your digital asset management needs.

TOKENOMICS

Moon Doge (\$Moon) Allocation

TOKENOMICS

Name : Moon Doge

Ticker : moon

Decimal : 9

Max supply : 1,000,000,000

Buy and sell tax: 5%

2% liquidity

2% Busd reflection

1% burn

PHASE 2

- Coin market cap listing
- Lock liquidity forever
